

Hey Dr. Doug,

As a grade school teacher you might share this with Parents having trouble with unruly Kids.

"After we had our first few Bio Cranials, our sitter began to notice a big difference in our youngest son. Every time our son began having behaviors at daycare, our sitter would tell us that 'I think he needs to have his head squished again or whatever it is you do. (She can't remember Bio Cranial!). He is always a much happier, healthier, and agreeable child when he has had his biocranial treatment." T D

P.S. This is a quote from our son Hayden, "Yes! I know I'm going to sleep good tonight if we are going to see Dr. D."

We love our biocranial treatments and couldn't live without them!

Sincerely,

T D, Mansfield, MO
